The company **Aquasanita** is one of the most well-known manufacturers of kitchen equipment on the market. They export over 80% of their products to more than 30 countries worldwide. Aquasanita sinks and faucets meet the most demanding requirements for processing and quality of construction.

The very modern and practical stand kitchen faucet Eco 2561 without a shower by the brand Aquasanita will look great in any kitchen.

The surface of the sink faucet is made of crushed granite. A black granite faucet, as well as a sand-colored, white, or gray one, will perfectly complement a granite sink in similar shades. Of course, it is also possible to use this lever faucet with stainless steel sinks, where it will enhance the overall impression of the washing area.

The granite sink faucet is equipped with a high-quality ceramic cartridge from the Kerox brand and a Neoperl aerator reducing water consumption. The surface of the faucet is cleaned similar to the sink made of the same material, if necessary, simply wipe it with a damp cloth with regular soap.

Key features of the AQUASANITA ECO 2561 kitchen faucet
