The company **Aquasanita** is one of the most well-known producers of granite sinks on the market. More than 80% of its products are exported to over 30 countries around the world. Aquasanita sinks meet the most demanding requirements for processing and quality of workmanship. Currently, Aquasanita is giving its sinks a new name **HELIKA**. With the idea of **living life at a slower pace** in harmony with nature. Therefore Helika, translated as snail. Helika products are designed to support a slower lifestyle and create a warm, caring atmosphere in kitchens.

The most famous sink brand Aquasanita has introduced a premium range of sinks called TURTL®GlossyCoat. This range also includes the sink **Turtl Notus 765.0E**. The elegant kitchen sink Notus 765.0E can be placed in both rustic and modern kitchens.

The Turtl Notus 765.0E kitchen sink is not only **practical, but also elegant**. The sink is made of a special resin mixed with gelcoat material. It is a unique production technology that makes the sink extremely durable and more glossy.

The sink is an ideal choice for demanding customers who appreciate comfort and practicality. The sink has a sufficiently deep bowl for convenient washing of even bulky dishes. The drainer allows for drying individual dishes.

The package also includes an **eccentric drain control**. The eccentric allows for draining water "dry-handed", i.e. using a controller installed opposite the kitchen faucet, see the photo. The sink drain also serves as a plug. By simply turning the eccentric controller, you can drain or fill the sink with water. If you choose not to use this eccentric control, you don't have to. You can place, for example, a recessed spring dispenser into the pre-drilled hole in the sink. Therefore, you will manually control the sink drain.

The package also includes a **metal grid for the sink**, which protects the sink from wearing out. It is not necessary to remove the grid when using the sink, the water drains nicely into the drain.

The main advantage of the Turtl sink manufacturing technology is the stronger durability of the **protective gel coating** and its extreme hardness. Turtl sinks with a gel coat can withstand high mechanical external influences and are resistant to impacts. Innovative mixture and advanced polishing processes ensure that the surface of the sink is precisely polished to a mirror-like shine. The sink meets the highest quality standards. Turtl sinks have excellent resistance to discoloration. The surface shines and the bright white color lasts for years. If you are looking for a purely white sink, the Turtl sink will be the right choice! At first glance, it looks like a ceramic sink, which has much better properties than a granite sink.

Surface treatment TURTL® GlossyCoat

GlossyCoat is composed of gel polish that creates an extremely hard protective layer, which provides exceptional strength to the sink surface. The advantage of gel polish is its homogeneity, which prevents the accumulation of microbes and bacteria on the surface. During production, GlossyCoat is applied to the sink in a shell-like form, in which the sink is encapsulated. The inner part of the sink is made of robust artificial stone. Resin in combination with a thick layer of Coatu gel creates extremely durable Turtl sinks, setting a new trend in kitchens.

Key features of the AQUASANITA TURTL NOTUS 765.0E kitchen sink

- imitation of a ceramic sink with a drainer
- made with special technology
- made from a special resin mixed with gelcoat material
- Turtl Notus 765.0E comes with an extended 5-year warranty.
- ideal choice for stylish kitchens
- The depth and size of the basin allow for its easy and practical use.
- rich sink accessories: eccentric control, metal grid for the sink
- two pre-drilled holes designed for a battery and an eccentric
- sink for cabinet 45 cm (minimum cabinet size), installation on countertop
- sink resistant to scratching, high temperatures, dents, UV radiation
- easy maintenance of the sink, simply wipe it with a damp cloth

Parts of the packaging:

- Sifon
- Excentric control
- Release.
- Robbery
- Metal grille

Parameters

Basic parameters

Sink type:	Sink with a drainer
Sink shape:	Rectangular
Orientation:	Double-sided orientation
Sink material:	Granite
Width of the kitchen cabinet:	45 cm
Sink mounting type:	Upper
Sink style:	Rustic / Retro sinks
Drain the sink.:	9 cm
Product TARIC code:	69101000

Others

Eccentric control of the drain:	Yes
Pre-drilled hole for:	Battery + additional opening
Possibility to drill another hole:	No
Warranty:	5 years

Dimensions of the main tray (cm)

Width of the basin:	39
The length of the bathtub:	32
Depth of the bathtub:	19
Minimum width of the cabinet:	45
Round sink:	No
The average size of the basin.:	No

Sink dimensions (cm)

Width of the sink:	46
Sink length:	76.5
Sink depth:	28
Sink weight (kg):	19

Dimensions of the sink package (cm)

Width of the packaging:	51.5
Height of the packaging:	32
Depth of the packaging:	92
Weight including packaging (kg):	20.1
