Axis Kitchen is a European brand of kitchen equipment, specializing in the production and sale of high-quality granite sinks. The company is among the market leaders in the segment of sinks and kitchen faucets. The products are characterized by attractive design and high-quality craftsmanship.

Luxurious and extraordinary are two words that perfectly describe the **Axis Antiga 620 sink**. It is a so-called **modular sink** designed to be mounted on a cabinet, suitable not only for Provence-style kitchens but also for modern interiors. The sink will be a perfect centerpiece in the kitchen. Antiga belongs to the granite sinks that add character to the interior. It will fit perfectly into both modern and rustic kitchens.

Installation of the sink is mainly recommended for non-absorbent materials. In the case of a stone countertop, the sink is installed beneath the countertop. In the case of a wooden countertop, we recommend that the sink slightly overhangs the countertop to prevent contact with water.

If you have been longing for a ceramic sink, but you don't trust the glaze or the price is off-putting, this Antiga 620 granite model is the perfect solution for you.

The surface is very smooth and you can choose from two colors (white and black granite). The main advantages of granite sinks include their resistance to scratches, thermal shocks, high temperatures, and impacts.

Key features of the AXIS ANTIGA 620 kitchen sink

- granite sink in white and black color
- Antiga 620 comes with a 10-year warranty.
- It belongs to the category of modular sinks with installation on a cabinet.
- The sink will become the perfect dominant feature of the kitchen counter.
- suitable for cabinet from 62 cm
- sufficiently deep sink bowl, 16 cm
- granite sink resistant to scratching and high temperatures

Tips for cleaning granite sinks: mix baking soda with water to create a paste. Use a sponge to easily clean the sink. This method helps remove limescale or unsightly deposits such as those from coffee or tea.
