Minimalist granite sink without a drainer, Zorba 440E, made by the well-known **company Deante**, which belongs to the top manufacturers in the field of granite, stainless steel, and ceramic sinks. Deante has been on the market for over 30 years, so it represents a guarantee of quality. Deante brand products are so-called ProEco, which means that natural materials and eco-packaging are used for production.

The granite sink **Deante Zorba 440E** has the advantage of easy maintenance, color compatibility with the kitchen unit, and a timeless design. The sink is mainly intended for smaller kitchen units, corporate kitchenettes, simply anywhere where saving space on the worktop is needed.

The smaller granite single-bowl sink without a drainer Deante Zorba 440E doesn't take up much space and comfortably allows you to wash everything you need in it. The back of the sink allows for the installation of a kitchen mixer tap and also provides enough space for **eccentric control** or a soap dispenser. The automatic drainage closure is a system that allows you to open and close the water drainage using a button. An important advantage of this solution is the fact that one movement is enough for immediate water unlocking without having to immerse your hands.

The advantage of a granite sink is its **color variability** and the possibility to match it with the rest of the kitchen, easy maintenance, and attractive design. Among the main benefits are excellent resistance to impact, scratches, and high temperatures. The sink has hydrophobic properties, which means that its surface not only does not allow water molecules to pass through but also repels them. Therefore, the sink is easy to keep clean.

Key features of the DEANTE ZORBA 440E kitchen sink

- granite sink without a drip tray with eccentric control
- Zorba 440E comes with an extended 10-year warranty
- the most common choice for customers in smaller kitchens
- sufficiently deep sink bowl, 16 cm
