

Donner Water filtration cartridge GAC10-C (activated carbon granules) (aktivní uhlíková kartuše granulát)

EAN: 8596220013002

6,00 €

5,00 € bez DPH

The Donner GAC10-C activated carbon filter cartridge is a high-quality universal filter cartridge that meets strict standards.

Filtration carbon cartridge Donner GAC10-C is used for filtering chlorine, its compounds, and other harmful organic substances from water. Active carbon can also remove so-called trihalomethanes "THM" from water, which are highly carcinogenic compounds formed during the reaction of chlorine with microorganisms. The carbon filtration cartridge will also rid the water of other organic substances such as bacteria, pesticides, herbicides, heavy metals, drug residues, and phenols. Additionally, it significantly improves the unpleasant taste and odor of the water.

The advantage of the Donner GAC10-C carbon filter cartridge is its compatibility with most reverse osmosis and filtration devices.

Key features of the Donner GAC10-C filter cartridge

- quality certified filtration insert
- active carbon cartridge granules
- made from coconut shells
- compatible with most reverse osmosis and filtration devices
- it removes chlorine, organic compounds, and suspensions from water
- it disinfects the water
- Does not affect water hardness
- Carbon as a natural product
- It removes both organic and inorganic impurities
- it gets rid of the unpleasant taste and odor of water
- regular exchange about every 6 months

Parameters

Basic parameters

Filtering properties:	Water
Content of the package (pcs):	1
Lifespan:	Approximately 6 months
Material:	Active carbon
Intended for:	most of the reverse osmosis and filtration devices
Warranty:	2
HS code:	42121

Packaging dimensions

Width of the packaging (cm):	25
Height of packaging (cm):	38
Depth of packaging (cm):	10
Weight including packaging (kg):	0.378
