HEPA Filter is intended for Jet Dryer LIGHT hand dryers.

The certified HEPA filter is used to capture even the smallest dust particles.

Cleaning the air and HEPA filter

- With a light tap or by using a vacuum cleaner

- The use of a soft brush is possible.

How to remove the filter from a jet dryer.

Grab and pull out the drip tray from the device - you will find the air filter behind the drip tray. Pull out the HEPA filter from the device by pulling the handle on the filter body towards you.

Rear placement of the filter into the dryer.

Put the HEPA filter back into the device with the black rubber seal facing upwards. Insert the filter all the way into position. Then insert the drip tray back into the device.
